

TECHNICAL SPECIFICATION

GIG NO. : 1109546
PART No. : 2272
Vocab : 5G
Item Description : Vent Valve Tester

Purpose : Vent Valve Tester is a portable device used to check the functioning of the Nickel Cadmium aircraft battery cell vent valves.

Specifications:

1. Vent Valve operating Pressure : 0.2 to 0.6 Kg/cm² (0.196 to 0.588 bar)
2. Recommended pressure input : 2.0 to 3.0 Kg/cm²

Main Components :

1. Pressure Gauge (operated Range) : 0 to 1 Kg/cm²
2. Pressure Regulator : 10 Bar
3. Vent Valve Checking tool : 05 Vent valve checking capacity
4. Air compressor : To provide air pressure up to 10 Kg/cm²
